

WAGCM60

Made Locally in WA

WAGSS continuous mixing systems includes both skid and trailer mounted grouting equipment. The unit is designed to mix and pump neat water/cement, cement/bentonite, and most packaged grout mixes.

The great advantage of this grout machine is it allows continuous mixing and pumping, while the hopper is feeding the pump another batch can be mixed. This versatile heavy duty unit is easy to use and all components are easily accessible for cleaning and maintenance.

Speed (RPM)	100	200	300	400	500
Capacity (LPH)	766	1532	2298	3064	3830
