

H150/BF Hydraulic Grout Pump & Mixer Pressure and Oil Flow Requirements

Grout Pump

Pressure requirements 50 – 65 bar (min 45 bar)

(At 60 Bar the Stall pressure of the 63mm leg will be 400 psi)

Oil Flow Rate required 26 litres per Minute

Port Sizes

Inlet (Pressure) JIC male -10

Outlet (Return) JIC male -12

Seal Kit part number PDSK0505

Mixer Motor

Pressure Requirements 140 bar

Oil Flow Rate required 20 litres per minute

Port Sizes

Inlet 1/2" BSP Parallel Female

Return 1/2" BSP Parallel Female

Preferred Mixer Rotation Anti - clockwise

Seal Kit part number HP-SK

NOTE: If you wish to increase any of the above values please contact WAGSS for verification. Excessive flow and or pressure may damage components.
