

# Wags CM40PP (Pneumatic)

**Use:** The Wags CM40PP series are heavy duty, high pressure grouting units for applications such as dams, tunnels, post-tensioning, underground mining and many heavy construction jobs. The Wags CM40PP series easily mixes and pumps slurries of neat cement, fly ash, bentonite, microfine cements and post tensioning grouts.

## Features

- Produces 0-35 LPM at forceful pressures up to 500 PSI
- Single 220 LTR high speed vortex paddle mixer
- Hold hopper for continuous grouting
- Dependable 5 inch stroke piston pump
- Internal mixer baffles for a superior mix
- Variable speed mixer
- Pneumatic oiler
- Water meter for exact dosing and mix ratio ( extra )

## UNIT SPECIFICATIONS:

MIXER CAPACITY	220 LTR
MIXER DELIVERY	35 LPM / 500PSI MAX
